JESSICA MONZERRAT MEDINA CARRILLO

Intelligent Computing Engineering

I am a dedicated, demanding, responsible, communicative, creative, collaborative and committed person with my work. I seek to obtain experience in the professional field, providing the company with my knowledge and willing to continue learning about the area, keeping myself constantly updated.

EDUCATION

University of Colima, Colima, México   2019 - 2023

- Intelligent Computing Engineering

WORK EXPERIENCE

FRONTEND DEVELOPER, DESIGNER AND UX / UI

HyperOx   September - Present

- Currently, I contribute to the development of a cloud project at this company, serving as a UX/UI designer and Frontend Developer. My responsibilities encompass the creation of wireframes, visual design, and development of various pages using languages such as HTML, CSS, SASS, Bootstrap, JavaScript, ReactJS and Python. Throughout this process, I have enhanced my technical skills in responsive design, landing pages, information architecture, security, and user accessibility, among others.

TRAINEE WEB STRATEGIST AND DEVELOPER

Instrumental Group   June - December 2023

- In this role, I conceptualized and implemented web strategies for various clients, encompassing web audits, workshops, SEO, conversion flows, wireframes, design web pages, content implementation, quality assurance, and frontend development of specific modules. I utilized tools such as HubSpot, Figma, Sketch, Google Workspace, Screaming Frog, BugHerd, Notion, and ClickUp to enhance performance and creativity in each project.

TRAINEE DEVELOPER JUNIOR

Dirección of Sistemas UDC   June 2022 - May 2023

- Creation of the Website "Truequesina" which consists of a system that allows to manage and monitor the book exchange process at the University of Colima. During the development I was using technologies like HTML, CSS, Bootstrap and JavaScript for the Front-End and for the Backend I was using PHP together with my database in phpmyadmi.
